APTIS ESOL GENERAL - B2 PERFORMANCE COURSE

Eight weeks, four sessions per week. Begin at W1D1. Each session is about 60 minutes. The main priorities are writing quality and lexical precision.

How to work

- Optionally complete the 60-minute Diagnostic Test before W1D1 to record a baseline; it is separate from the 32 scheduled sessions.
- Do the exercises in order and use a timer. Do not consult the key during a task.
- After each session, check answers in 14_COMPLETE_ANSWER_BOOK and enter recurring errors in 15_PROGRESS_ERROR_TRACKER.
- Use Writing, Vocabulary and Speaking Masterbooks for targeted repair. Do not memorise full model responses.
- For listening, ask a voice-enabled reader or TTS tool to read the transcript from the Answer Book without showing it to you. Play at most twice, then answer. A helper can operate the book so the transcript remains unseen.
- For speaking, record your answer or use a voice chat. Photo briefs in this printable course substitute for physical photographs; describe the brief before discussing the topic.
- Full mocks are in 13 MOCK_EXAMS. Complete components with official time limits on separate days if needed. Score practice accuracy and review errors; do not convert percentages into CEFR levels.

Short ChatGPT commands

- APTIS WnDm - WRITING MODE: Check my response for task fulfilment, register, grammar, vocabulary and cohesion. Give three priorities before rewriting anything.
- APTIS WnDm - SPEAKING MODE: Ask the prompts one by one. Keep official timing; give feedback after the section.
- ERROR DRILL: Make ten short questions on these errors: [paste]. Hide answers until I finish.
- WEEKLY REVIEW: Summarise my tracker errors, choose the top five, and set next week's repair goals.
- MOCK REVIEW: Analyse my answer IDs and writing; identify patterns without assigning an official Aptis level.

Replace WnDm with any code from W1D1 to W8D4. Paste or attach the relevant exercise page so the tutor sees the exact prompts.
